I heavily benefit from listening to XM Satellite Radio and its traffic and weather channels. XM satellite radio provides a level of variety and quality that are not available anywhere else, not to mention the overwhelmingly irritating barrage of commercials. FM used to be minimal commercials.

I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I listen. It is a violation of my rights.

Respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM. The NAB can change with the times or keep losing to quality programming like XM satellite radio.
